Finlogon Personal Edition (PE)

Futronic FinLogon Personal Edition (PE) is Microsoft Windows software that can accept fingerprint captured from the Futronic FS80 USB2.0 Fingerprint Scanner, extract its physical characteristics (minutiae) and match with the pre-registered/stored data to control the Windows Logon on any PC. So fingerprint can be used to logon computer and has the following advantages over the traditional username and password logon:

- Human fingerprint is unique
- It can't be stolen by others
- It wouldn't be forgotten
- It is with user all the time

This is free software from Futronic and is included in the retail package of Futronic's FS80 USB2.0 Fingerprint Scanner. If you already have FS80, you can get FinLogon PE free from the "Download" page of Futronic web page and start to use it now.

FinLogon PE users can also make use of two free software tools from Futronic, One Touch Password Filler and Fingerprint File Encryption, which come in the **FinLogon Add-on pack**, to have a more secure and convenient computing environment
