Hand-held Metal Detector

Vehicle/Cargo X-ray Security Checkpoint

Walk Through Metal Detector

X-ray Baggage Scanner

Authentication and Face-recognition System

Vehicle/Cargo X-ray Security Checkpoint

Inspection Spot:

Gun
Plastic Oil Drum
Metal Oil Drum

Product Features:

- Full Auto-scanning
- High-performance Image
- Robust Image Enhancement
- Smart Cloud Platform
- All-weather Operations
- Sound and reliable precaution
- Customized Solutions
- System Integration

Performance Index:

| Inspection Mode	In-line Real-time Scanning
Max. Vehicle Size	3.5M(W)*4.0M(H)*18M(L)
Inspection Speed	60 vehicles/h
Safety	High-class

Applications:

Applied to vehicle security inspection in Park Entrance, Highway Checkpoints, Borders, Ports, Critical Infrastructure, Event Security.Scan smuggling and find hidden individuals and contraband including explosives, weapons, narcotics and weapons of mass destruction. The system adopts tunnel design, drive-through inspection technology and real-time imaging, suitable for quick drive-through inspection of vehicle in small/medium size
